GEOGRAPHY

Geography is the study of the spatial inter-relationships of people, places, and environments. Geographers are concerned with place, with differences in features on the Earth's surface and with explaining these differences. Geographers pose and seek answers to the questions 'Where?', 'Why?', and 'How?', and evaluate alternatives.

Students will investigate contemporary issues related to people and the environment. Issues that challenge society inevitably have a spatial component, and hence are potentially geographical issues. The unique, integrated approach of geography to the social, economic, political, and environmental aspects of issues will lead students to greater understanding and the basis for resolution.

GEOGRAPHY - NATURAL AND ECOLOGICAL HAZARDS (ELECTIVE UNIT)

Year Level:	10
SACE Credits:	N/A
Pathways:	Stage 1 and 2 Geography, History, and Society
	and Culture, TAFE and University
Prerequisites:	Not required
Length:	1 semester

Course Description:

This unit focuses on identifying risks and managing those risks to eliminate or minimise harm to people and the environment. Building on their existing geographical knowledge and understandings, students examine natural hazards including atmospheric, hydrological and geomorphic hazards. They also explore ecological hazards, for example, environmental diseases/

GEOGRAPHY - GLOBAL TRANSFORMATIONS (ELECTIVE UNIT)

Year Level:	10
SACE Credits:	N/A
Pathways:	Stage 1 and 2 Geography, History, and Society
	and Culture; TAFE and University
Prerequisites:	Not required
Length:	1 semester

Course Description:

This unit focuses on the process of international integration (globalisation) as a conceptual 'lens' through which to investigate issues in human geography. In doing so, it integrates the sub disciplines of economic, cultural and political geography. The topic provides students with an understanding of the economic

and cultural transformations taking place in the world today, the spatial outcomes of these processes, and their political and social consequences. It will better enable them to make sense of the dynamic world in which they will live and work. It will also allow them to be active participants in the public discourses and

students will develop more of an understanding about

using and applying geographical inquiry tools such as spatial technologies, to model, assess and forecast risk associated with both natural and ecological hazards.

There will be four summative assessment items across the semester which will involve a range of activities including but not limited to: an investigation, a fieldwork report, an issues analysis

debate related to such matters.

HISTORY

History is a disciplined process of inquiry into the past that develops students' curiosity and imagination. Awareness of history is an essential characteristic of any society, and historical knowledge is fundamental to understanding ourselves and others. History promotes the understanding of societies, events, movements and developments that have shaped humanity from earliest times. The study of history is based on evidence derived from remains of the past. It is interpretative by nature, promotes debate and encourages thinking about human values, including present and future challenges. The process of historical inquiry develops transferable skills such as the ability to ask relevant questions; critically analyse and interpret sources; consider context; respect and explain different perspectives; develop and substantiate interpretations, and communicate effectively.
